High School Party

On Friday, the 15th of November, a party was held by the Arrowwood High School students.

The programme committee, Edna Beagle and Eugene Burris, provided an enjoyable series of games and contests and conducted the most successful school party that the pupils ever attended.

The initiation of the Freshmen took up a large portion of the evening, and included everything from aeroplane rides and talking to an electric chair which shocked and thrilled each member of Grade IX.

The girls especially strenuously objected to having their foreheads and wrists painted with a chemical which, not noticeable at the time of application, soon showed a large black 'X' and are still very noticeable.

After the initiation a few more games, including a little impromptu rugby, were played, and a particularly elusive freshman was led through the same process as her class mates.

Just before supper Margaret and Lorna Richards sang a duet which was appreciated by everyone. Later the party went to the lunch room and partook of the lunch provided by June Clifford, Dorothy Hasketh, Hazel Taylor and Floyd Cary.

After supper a few more games were played and at 11:30 the pupils disbanded and wandered wearily home.

MILU NOTES

William Holten has taken the place of our previous butcher who moved back to Calgary last week. His brother Mark is taking over the draying business.

Nelsie Peterson enjoyed a pleasant visit last week-end in Calgary.

The Milo hockey team are back to work again and are in hopes of having the rink in shape before long.

SHOULDICE NOTES

A very pretty wedding of much interest was performed on Oct. 19, at the home of Mr. and Mrs. H. Griffith, Calgary, by Rev. R. Davies of St. Agnes, Hinton, when Sarah Elena Weberg of Shouldice became the bride of Mr. J. Taylor of Shouldice. The brides' maid was Mrs. Mayme Griffith of Calgary, while Mr. Taylor's nephew, Geo. Kottis of Arrowwood acted as best man. The bride was given in marriage by her oldest son, W. J. Weberg of Calgary. The bride wore a French Blue Satin gown trimmed with brilliants, and carried a bouquet of carnations. The brides' maid was dressed in Nile Green Silk Crepe and also carried a bouquet of carnations. At a wedding supper served at the home of Mrs. Hadden, 30 people sat down to a table centred by a three tier wedding cake. The many presents showed the high esteem with which the couple are held. Mr. and Mrs. Taylor will reside on the Taylor farm south of Shouldice. Their many friends wish them many happy years to come.

Shouldice is very quiet these (Continued on page 6)

BUFFALO HILL NOTES

Miss Frances McInenly was home for a few days visit from Carleton last week, returning Sunday.

The Buffalo School Teacher returned from Calgary Tuesday after being stranded by bad roads.

Hirst Goldthorpe has been doing some grinding with the Hammermill for Mrs. McInenly.

QUEENSTOWN ITEMS

Mrs. Whit's was a visitor to Calgary last week-end.

Mrs. Asselstine, Clifford and Nellie have moved to Calgary for the winter months.

Mr. C. Reed made a trip to Calgary last week with a load of hogs. He reports the roads very bad in some places.

The roads leading into Queenstown are in a terrible condition. It seems too bad that this is the case as it is hard for the farmers to get into town.

The cold weather is hard on the coal and there are those who were not prepared for the cold spell.

Mr. Asselstine was a visitor to Calgary last week-end.

Due to the bus not being able to get through the teachers had difficulty getting home from their convention held in Calgary.

It will not be till Christmas now and it is to be hoped that the roads will be in better shape by that time, if not, the children will have a hard time seeing Santa.

There have been more sleighs come into Queenstown the past three weeks than there has been for ten years.

Mrs. Rubelke and Jim were visitors to Calgary Friday week Nov. 8th.

ARROWWOOD ITEMS

Miss Alice Archambault left last Friday for Vulcan to commence her duties in the Vulcan Hospital. The best wishes of her many Arrowwood friends accompany her.

A large number of young spent a very enjoyable evening at the young peoples party in the Church basement Tuesday night. A good program was furnished by Sarah Duncan, Edna Beagle and Rosemary Lord, which was perfected by a nice lunch.

Mr. Leo Beagle and family are moving to this district for the winter. They will live in one of the farms occupied by Mr. J. P. Beagle of Arrowwood. They left this community several years ago and have resided near Neilburg Sask. since. Mrs. Beagle and two boys came by rail to Calgary where they were met by Mr. Hollenberg. Two sons and a brother of Mrs. Beagle accompanied the live stock and other belongings. Mr. Beagle will come later.

Wheat Yield For 1935

Research Department Searle Grain Co. Ltd.

The yield per acre of wheat for this past season in different areas and districts of the Prairie Provinces, is probably the most varied that has been recorded for many years past. On the whole the moisture that fell during the season was sufficient to produce an average crop in most districts and a bumper crop over a large area.

Unfortunately during the growing season rust and frost took a heavy toll from the growing crops and reduced prospective yields from a promise of 80 to 90 bushels to the acre in many districts down to as low as some points, as 5 bushels only.

Rust took a heavy toll in Eastern Saskatchewan and Manitoba. The loss from rust in wheat alone is estimated to have been about 100 million bushels.

Northern Alberta and Northern Saskatchewan suffered badly from frost. Only a comparatively small area, however, suffered from drought this year. This consists of a strip some 75 miles wide, starting around Lethbridge in southern Alberta and extending from there in a northeasterly direction to North Battleford. The area in Southern Alberta, Saskatchewan and Manitoba. South of the C.P.R. line, which some thought would be forever a "Great Canadian Desert", showed splendid prospects for a bountiful crop, indicating that whenever sufficient rainfall occurs the fertile soil in this area can produce abundant crops. Much of the fine prospective crop, however, was severely damaged by rust, which unfortunately not only substantially decreased yield, but as lowered the grade of the grain at some points down to the bottom limit.

The following outstanding features with respect to the varied conditions which prevailed, are worthy of note: (a) That Howard wheat gave a higher yield and better quality under rust conditions than did Marquis, Garnet, Red Bobs or Ceres, although, of course, Howard, not being a rust resistant wheat, still suffered somewhat. (b) That early sown crops suffered less than those which were seeded later.

(c) That with both the rust and frost across the use of fertilizer substantially increased the grade and yield of wheat oats and barley.

(d) That it seems certain that reasonable security with wheat crops will not be assured in Eastern Saskatchewan nor in the greater part of Manitoba until a wheat variety, highly resistant to rust, is available to farmers.

(e) The Thatcher wheat (a rust-resistant variety developed in Minnesota) and the new rust resistant varieties now being developed by the Dominion Rust Research Laboratory, Winnipeg, successfully withstood the rust infections and suffered no appreciable damage either in yield or grade.

Brotherhood Church Notes Sunday School at 10:30. The teaching staff are well trained and prepared for their respective tasks. Morning service by the Pastor. Evening service in charge of Intermediate Bible class followed by a short sermon by the Pastor. Everybody welcome to all services.

Farewell for Miss

Alice Archambault

A farewell party in compliment to Miss Alice Archambault, sponsored by the Catholic Altar Society was held at the home of Mrs. E. E. Jacques on Thursday, Nov. 14.

A large number of friends were present and all enjoyed the many clever games and contests in which everyone took part.

At the close of the evening a delightful lunch was served by the hostess, after which Mrs. Weins on behalf of the Altar Society and girls, presented Miss Archambault with a lovely manicure set and embossed leather case, also thanking her for her many deeds of kindness and favors she had done for the Society and hoped she would be very happy in her new home.

The party closed with "For She is a jolly Good Fellow" after which Alice thanked her friends and gave them a hearty invitation to come and visit her in Vulcan.

Arrowwood Midgets

The young hockey players are developing into a brilliant team and will regret the loss of their former coach, K. E. Hales, who had combined all their talents and had them performing nicely.

This year they are working to keep their team advancing and have organized with Eugene Burris and Mel Bowman coach.

The Midgets are wanting to buy suits and are trying to sell tickets. Pick your ticket and win a 220 lb. bacon hog.

ARROWWOOD ITEMS

Let the Cardinals be your host Friday, Nov. 22nd.

Will pay cash for small cream Separator, 150-100 capacity. Apply Resource, Office.

Born-To Mr. and Mrs. J. W. Thompson, of Milo, on Friday, Nov. 15, a son.

Born-At Mrs. Lowendon's Nursing Home on Saturday, Nov. 17th, to Mr. and Mrs. Nobart, of Shouldice, a son.

Mr. Wm. Harvey is at present a patient at the Holy Cross Hospital, having undergone an operation there.

Mrs. A. Horning, Avis and Norman, of Cowley, spent the week-end visiting with friends and relatives.

Mr. W. S. Benjamin has returned to Arrowwood and will visit with his daughter, Mrs. C. G. Taylor.

Mrs. Leonard arrived last Wednesday from California and will spend the winter at the home of her son, Mr. M. R. Leonard.

The United Church will hold a service as usual next Sunday at 11:45 a.m. in the Arrowwood School. Mr. Wilkinson is planning a special service, providing the roads are passable, on the life and compositions of Fanny Crosby. The choir will sing, "Some Day the Silver Chord Will Break," by Fanny Crosby."

The tenders of Clele and Delbert Duncan have been accepted as caretakers for the skating and curling rinks.

Mrs. T. Williams, who recently returned from the Hospital in Calgary, is making a very satisfactory recovery from her recent illness.

Mr. and Mrs. L. H. Irwin returned home on Tuesday from Oregon, where they had been on a visit with friends and relatives.

Mr. Chester Beagle was rushed to the Holy Cross Hospital, on Sunday, Nov. 17th, suffering from an acute attack of appendicitis. He was operated upon and at present is doing as well as can be expected.

Owing to the unsettled weather the W.A. of the United Church have decided to cancel the fowl supper but will hold a fancy work and home cooking sale in Board's Ice Cream Parlor at 3 o'clock on Saturday, Nov. 23rd. Tea and ice cream will be served and there will be a candy booth. Don't forget the date, time and place. Your patronage will be appreciated.

The church basement was the meeting place Monday evening, the occasion being a shower in celebration of the wedding of Mr. Jack Swanson and Miss Mary Fanny Weberg, which was solemnized a few weeks ago. The evening was spent in playing games and closed with lunch. Mr. and Mrs. Swanson intend leaving soon for a visit in Oregon. From there they will proceed to Vancouver for an indefinite stay.

TAKE ADVANTAGE OF THIS BACON HOG PRIZE AND BANK THE DIFFERENCE

Here is a real offer that will save you money . . . Give yourself and your family lasting enjoyment and entertainment the whole year through . . . This is all you have to do.

Difficult Problems

The problems which it may be expected will be discussed at the pending conference between representatives of the Federal government and premiers of the Canadian provinces will furnish plenty of material for conversations and negotiations.

If only one half of the difficulties which the western provinces have recently experienced and still are experiencing in finding sufficient revenue to maintain their ordinary services, to saying nothing of contributing substantially towards the cost of relief, can be removed a forward step will have been taken, and representatives of the provinces will leave Ottawa with something a little more tangible than hope for speedy recovery and for future progress.

One of the factors in the present situation that will have to be faced squarely is the fact that the cost of government is pressing heavily on the taxpayers, that there is just so much money available for the upkeep of services and that a shifting of burdens from one unit to another is not the way out of the trouble, though it may be a temporary palliative.

If several buckets are dipping water out of a well which is not being replenished from natural sources it is only a question of time when the well will run dry, and in the long run it does not make very much difference which of the buckets took most of the water out of the well.

That is actually the position of the taxpayer in western Canada. There are three buckets drawing on his resources, the federal, the provincial and the municipal, the last-mentioned, of course, including the schools.

The permanent solution of the difficulty lies not so much in a decision as to who is to be allowed to draw the most, or the least, water from the well but how the well is to be replenished, and until this can be determined, those in authority have to address themselves to the task of finding ways and means of conserving the presently available supply and making the utmost of it.

There are many ways in which a conservation policy might be put into effect and one of the most practicable would be to eliminate a good deal of the duplication and overlapping of services which have grown up, apparently without any blame attachable to any one in particular for the situation.

There are, for example, services which are being provided by both federal and provincial governments resulting in double costs for machinery and operation, in addition to a degree of confusion and ineffectiveness attendant upon two unrelated organizations trying to reach the same good by different roads.

In this category might be included debt adjustment machinery and to some extent agricultural services rendered by both federal and provincial administrations. These are only cited as illustrations of a number of fields of endeavor in which co-ordination of effort by a merger of duplicated services would not only bring about greater efficiency but would also save considerable expense to the taxpayers.

It is true that such changes and other activities in the same category objection might be raised that such services are essential because of the limitations of legislative competence, but if that is the sole barrier in the way of economy, then necessary legislative authority to disperse the difficulty should be sought and doubtless could be secured if a spirit of true co-operation on the part of all concerned is evidenced.

In the matter of sources of revenue also there is duplication which should be eliminated, a better defined allocation of spheres of taxation as between the several governing units. There should not, for instance, be two income taxes with two sets of costly machinery to gather the same type of tax from the same taxpayers, necessitating a double expenditure.

In pre-war and pre-depression years the fields of taxation were well defined and understood and governments, in those days, confined their revenue collection efforts within well defined channels. First departures from recognized practice and prerogative came with the emergency demands of the war and subsequently, as financial and economic conditions grew more severe, governments were loath to abandon what they had gained.

On the contrary, the practice of encroaching on one another's sources of income assumed serious proportions as the level of the tax in the well declined and the demand for more and more water grew with greater intensity.

With this situation confronting them, the participants in the conference will face a difficult task. While, no doubt, many suggested methods for replenishing depleted incomes will be offered, first thought probably will be given to conservation of the existing resources, and one of the most practicable means of doing this will be to stretch the tax dollar by eliminating duplication. This can be done, not only without impairing the services involved but should result in improving them and at a lesser cost.

Are You Running Tired?

Mr. Mabel Murphy of Westbourne, Ont., writes: "I had finished the first bottle of Dr. Williams' Pink Pills for Pale People. I had more strength and better health. New size, tablets 50 cents, 1133."

Cannot Get Italian Marble
League of Nations' sanctions against Italy have created an unusual situation in connection with the new League palace which was scheduled to be occupied in November. Most of the Rose marble used in construction of the palace comes from Italy, and much of it is now due to arrive. League sanctions prohibit the reception of goods under existing contract, so the League must look for its marble elsewhere.

After all, you bake for nourishment! Purify Flour—rich in gluten—has more "life" and nutrition. It also imparts that fine, tasty flavor which will make all your baking delightful.

Best for all your Baking

Finds Blindness No Handicap

War Veteran Has Developed Memory To Remarkable Extent

Captain Gerald Lowry, a blinded veteran of the World War, recently was one of the champions pitted at the British Bridge League Congress at Harrogate, England. His partner was a woman. Not only did they win but they were always the first pair to finish their hands.

Blindness has its compensations. Nature to some extent redresses the balance by developing other faculties. Captain Lowry is a remarkable example of overcoming the handicap and lives a more active and normal life than most people. He has developed his memory to such an extent that when a friend whispers the designations of his cards to him he remembers them throughout the game and where he has arranged them. When he has to play dummy the cards are named to him and he remembers them, too. The rest is easy. When the Harrogate tournament he played 32 calls and never forgot a card.

Captain Lowry before the war was an excellent golfer and amateur boxer. He still plays golf and boxes. He teaches his own ball and drives by instinct. His caddy tells him where his ball lies and where he should hit it to, and he never misses. He also learned cecography and has built up one of the most lucrative practices in London. — St. Thomas Times Journal.

Began In Ice Age

Scientists Believe Recent 'Quake' Originated 25,000 Years Ago

Persons whose sleep was interrupted by the recent earthquake may blame it on the great Ice Age.

It is at least 25,000 years ago the Ice Age ended, scientists estimate, but it was these same scientists who say that the quake was its guide.

Dr. L. C. Conant, director of the Cornell University geological station, explained the general theory of earthquakes in the northeast is that the earth is gradually recovering from the burden of a sheet of ice one to two miles thick.

"The melting of this tremendous pressure of the earth's crust. Every once in a while the strain becomes too great, moving just a trifle upward and northward. As a matter of fact, our instruments indicated there was a slight tilt to the north."

1935 Tobacco Crop Valued At \$8,000,000

Flue-Cured Tobacco Industry In Ontario Run On Scientific Lines

It looks as if the \$8,000,000 valuation put upon the Ontario flue-cured tobacco crop by the experts will be exceeded by the value of the actual producting material. In Canada, British manufacturers within the past few days. Yet it is only a few years since tobacco-growing in Canada was practically limited to a few farmers raising it for pot smoking or for a limited local market. Now approximately 30,000 acres of best soil in southern Ontario are almost exclusively devoted to the growing of tobacco. The 1935 crop amounting to 1,000,000 pounds, represents an increase of 25,000,000 in excess of the crop return of 1934. The flue-cured tobacco and tobacco products industry has become a Canadian tobacco where, hitherto, American and other tobaccos had been used, while the Canadian leaf has an excellent market in Great Britain in competition with foreign leaf.

The Imperial Tobacco Company of Canada, Limited, which buys a great part of the Canadian crop, has had much to do with the great strides taken by the tobacco-growing districts because it has had a policy for years of trying to encourage domestic production. First, however, it was necessary to gradually teach growers how to grow tobacco in a commercial, profitable way. The company has its own chemical and other researches of the soil, of moisture, and other conditions contributory to the best grades of tobacco, taught the grower his own way by following experimental plots, and in other ways interested him in improving his crop for the use of the domestic market. It is the illustration to him the precise processes by which the domestic market might be developed in a profitable way. This, and the researches of government experts combined largely in producing the present condition, and to the creation from a small and unmarketable crop, a large and marketable crop, valued at more than \$8,000,000 a year.

The official edict has gone forth that the new styles for the ultra fashionable gowns will not embrace any wasp waists. There will, though, be a sting in the prices.

Charwoman (to neighbor with whom she is having a spat)—What I say is there is ladies' air ladies' air you ain't neither.

Reform in Examinations

President of University of Alberta Would Make Entrance Less Rigid

Entrance examinations to the University of Alberta, were in the presence of being made less rigid in the formal, Dr. R. C. Wallace, president of the university, told 200 southern Alberta high school teachers in an address. He called the final examinations "the bugbear of Alberta teachers."

Reform in examinations would be directed towards leaving the teachers free to express themselves intuitively and then give them the fundamental, broad test to students matriculating from high school to university, Dr. Wallace said.

"We are trying to achieve, the aim at the university that every examination paper set shall have one or two questions which cannot possibly be answered by memorizing notes," he continued.

The university president read as an example of the type of examination he was proposing a set of four examinations presented by Alberta University authorities to determine a scholarship winner last year. They included general examinations to test knowledge in the fields of English, history, science and mathematics, having none of the formal type of examination question.

Expression of the teachers' personal must be made under Dr. Wallace declared, and lessening of the strict examination rules would be the most effective method of accomplishing this end.

All types of political and social theories should be taught in school, Dr. Wallace asserted, but teachers should keep their own personal bias on such subjects in the background.

Grows Rice For Export

Australia Has Developed New Industry In Ten Years

Australia, which ten years ago imported nearly all of the rice consumed throughout the Commonwealth, is now producing not only enough for home consumption, but has a surplus for export. The 1934-35 rice crop of New South Wales yielded 35,000 tons of paddy rice, not including that retained for seed, according to the Agricultural Department of the Canadian National Railway.

Stone Mountain is a massive dome of muscovite granite in De Kalb county, Georgia, and is said to be the largest in the world.

SASKASAL

MINERAL SALTS

Medicinal Salt from Little Salt Lake, Utah, is the purest and most concentrated source of mineral salts. It is used for the treatment of rheumatism, gout, and other ailments. It is also used for the treatment of skin diseases, such as eczema and psoriasis. It is a natural product and is free from all artificial ingredients.

Cattle Exports To U.S.

117,000 Head Shipped From Canada

For First Ten Months

Approximately 100,000 head of heavy cattle have been exported from Canada to United States in the first 10 months of this year. Figures to the end of October reveal 117,000 head have gone over and it is estimated that 17,000 are calves. U.S. tariff on live cattle is three cents a pound when the animal is over 700 pounds and 2½ cents when below that weight. So a 1,100-pound steer would meet a customs duty of \$33.

The year has witnessed an entire reversal in the export trade in Canadian cattle. Last year nearly all Canadian cattle exports for the first 10 months went to the United Kingdom. The total shipments were 46,000.

For the corresponding period this year they were 6,500 whereas the shipments to United States jumped from 4,700 cattle and calves last year to 117,000 this year.

The reason for the shift was the shortage of beef cattle in the United States and relatively lower prices in United Kingdom market.

Would Conserve Game Birds

Visitor To Alberta Advocates Hunting With Hawks

Alberta offers an ideal place for the ancient and honorable art of falconry—the hunting of game birds with hawks—according to Capt. Luff Meredith, of New York.

First man to fly falcons in Alberta, Capt. Meredith was in Calgary after a visit to the Rosebud district, where he saw a few birds—one an Alberta hawk. He did not hunt game birds with his hawks, but few seem loath to pigeon.

The falconer advocates his chosen sport as a means of conserving game birds, at the same time aiding in the extermination of birds of prey such as crows and magpies.

"I believe the sport would be a great conservator of game birds in the west," he declared. "Falconry, an entire party can share in the thrills of hawking."

If hawks were used generally instead of guns, the death rate among game birds would be cut to about one-tenth, he said.

Must Be The Climate

A report from Fort Erie, Ont., of a lemon niche in circumference growing on a plant in a home there is a "small potato story." Mrs. J. D. Gillock of Calgary, claims. She said she has a lemon tree that last year produced a lemon 37½ inches in circumference from which she made two pies and two glasses of lemonade. At present there is no lemon, a green lemon, still growing, which measures 11½ inches in circumference.

A United States government scientist has advanced a theory that explosions in city sewers are caused, not by sewer gas, but by exhaust gas from automobiles, which is heavy and sinks into sewers.

John Timko of New Toronto went to work at a factory with a clear conscience recently—he paid back \$12.40 relief money he received in 1934 when he was sick and out of work. Relief officials said it was the first case of its kind in the history of the town.

London's Debt To Thames

City Is in Real Sense Founded On Ship

Its growth into the largest city of the country and of the world is owed by London to many historical accidents and to one very important fact—its geographical position. The east of government might have been elsewhere and London might have had to share its political ascendancy with Winchester or New York. But it was almost inevitable that a large trading community should be established around the lowest bridge on the Thames, which flows into the narrow seas heading to the Continent, and to the world. The Thames is the root cause for London's existence, and the city is in a very real sense founded upon ships—P.L.A. Monthly.

ASK YOUR DOCTOR FIRST, YOUR MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons—instead of their doctors—on remedies for their children's ailments. If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used milk of magnesia, doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia—the safe remedy for your child."

Remember this—And Always Say "Phillips' Milk of Magnesia." When You Buy, Your child deserves it for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form!

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores. Following directions, never an excess of one tablet at a time. A teaspoonful of Children's Milk of Magnesia.

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know about, for the relief of headaches, or the pains of rheumatism, neuralgia or sciatica, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", remedies were advised by physicians which had been bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year after year without ill effects have proved that the medical findings about its safety were correct.

Remember that "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person's daily regularity.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company.

Look for the Bayer Cross in the form of a cross on every tablet.

Eliminates Stasis

Boon For Radio Fans Is Seen In New Demonstration

Radio reception free from static even during thunder storms to severe that sparks leap from the antenna wire is the offering of Major Edwin H. Armstrong, professor of electrical engineering at Columbia University.

He demonstrated the new system before the Institute of Radio Engineers in New York. He described the effect as the same as sending one stream of traffic—the static—through an underpass while the desired signal went across the bridge. He said the secret lay in frequency modulation instead of amplitude modulation, the prevailing system.

About 20 per cent. of the students preparing for the medical and dental professions in Germany are now women.

Mothers Aided by Guide to Better Control of Colds

Practical Plan Is Helping Families Everywhere to Have Fewer, Milder and Shorter Colds.

SIMPLE AND EASY TO FOLLOW Already, thousands of Canadian mothers are benefiting by following Vicks Plan for Better Control of Colds—proving for themselves that it is a practical home guide to fewer and shorter colds.

This commonsense, medically sound Vicks Plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians—further proved in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan:

1. **To Help Build Resistance to Colds** Live normally—avoid excitement. Eat simple food and keep circulation regular. Drink plenty of water. Take some exercise daily—open doors frequently. Get plenty of rest and sleep.

2. **To Help Prevent Many Colds** At the first warning nasal irritation, sniffle or sneeze, or slight Vaseline—just a few drops up each nostril. Vaseline is especially designed for the nose and upper throat—where more colds start. Used in time Vaseline helps to prevent many colds—and to throw off early colds in the early stages.

3. **To Help End a Cold Sooner** If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks VapoRub. VapoRub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster. (2) By inhalation of the penetrating medicated vapors direct to the inflamed air-passages. Through the night, this combined action soothes action loosens phlegm, eases irritation, helps break congestion. What Vicks Plan can do for you and your family can be proved only by trying it. Directly following the Vicks Plan in each package Vicks Vaseline and Vicks VapoRub.

MISS ALADDIN

—By—
Christine Whiting Farmer
Author of
"One Wide River To Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-bell, a gay, irresponsible girl of nineteen, with no sense of the duties of her position, but for her coming-out party. Suddenly, in the market crash, her independent father loses all his money, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home in that remote but hospitable country.

After much consideration Cousin Columbian's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy sets out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him how they got to Pine Ridge. They ascend the hill, look around, and then go on to Cousin Columbian's. There Mark Adam tells Nancy that his brother Jack Nelson has been hired to help out at the mine. He is to be with Jack Adams. Nancy finds that she is homesick, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare. She tells them to induce others to let them have.

Nancy's parents and friends give their liberal support to her request for books, and a sizeable box arrived due course. Father Adams painted a sign for the library, and the Adams family worked on the shelves for the books and decorations to make the room look like a library.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matt Nelson, uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a full of school children, which was stalled across the road with its back wheels resting in a snow-dripped gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a reward the explorer Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

Now On With The Story

CHAPTER XXIII—Continued

Nancy started, smiling as she looked at the wife of the head bookkeeper on the back road, one of the library's most faithful visitors.

"I'm leaving day after tomorrow and am glad of this chance to say good-bye."

The woman said, as she sat down in the cushioned chair, "That's why I came. I mean to stop at Miss Nelson's, but when I saw these open doors I knew you'd be here. I want to thank you for what you've done for—well, for every one in Pine Ridge, Miss Aladdin." She glanced up at her face lighted by a smile while Nancy realized with something of a shock that this faded woman was quite young, probably not ten years older than herself. "Do you mind my saying, Miss Aladdin?" she questioned a bit shyly. "Sometimes I've almost wondered if that's what you are—a sort of magician who has worked miracles."

Nancy laughed, flushing a little too.

"It wasn't a miracle at all, if you mean this library. It was only common sense, and a bit of elbow grease."

"No," answered her caller wisely. "It was more than that. It was thinking how you could make life happier for other folks. It's made all the difference between exile and—home, to us!" she added. "My husband's better now, really better; and it's due to nothing in the world but having good books to read—somebody to take him away from himself and all our worries. Is it any wonder we think of you as Miss Aladdin?"

When she was gone Nancy sat there feeling strangely humble, a lump in her throat that threatened to grow bigger.

"It ought to have gone to see those people," she said regretfully. "I'll be thinking how to take him away from himself and all our worries. Is it any wonder we think of you as Miss Aladdin?"

When she was gone Nancy sat there feeling strangely humble, a lump in her throat that threatened to grow bigger. "It ought to have gone to see those people," she said regretfully. "I'll be thinking how to take him away from himself and all our worries. Is it any wonder we think of you as Miss Aladdin?"

"It's meek up back of the houses," she planned, locking the door. "If Jack sees me he'll want to go along, and somehow I'd rather be alone. I can stay a half hour and get back before the Adams send for me. I do hope Matt will have cheered up by

evening. I just can't stand the way his eyes look."

By skirting the village it was possible to gain the hilltop unobserved, but it was a steep ascent, and Nancy was breathless when, emerging from the woods, she started toward the ancient landmark. "Then, as an animal will stop when suddenly alarmed, the girl stood still. Some one was there, half hidden by the gigantic tree-trunk. How disappointing! Her

tryst on this wonderful spot must be forgone. She ventured one cautious backward step, but a twig snapped under her foot, and the intruder, alarmed as startled as herself, turned quickly.

"Oh!" exclaimed Nancy. Her heart was thudding. "I didn't dream—I mean, Matt, I—thought..." she murmured, for Matthew had sprung up, an unsmiling Matthew, who said, curiously, she noticed, as he came toward her. "This it is, Nancy, or—am I dreaming? No, I'm not crazy!" (He smiled a little.) "But I've been lying here for an hour or more waiting I had the power of Aladdin, so I could rub my lamp and—make you appear before me just like that!" (He smiled again.) "Nancy thought, her mouth curving in a smile: 'What other fellow in the world would say a thing like that?'"

Then with a sudden impulse she stretch out both hands.

"Touch me, and see!"

CHAPTER XXIV.

No use trying; it was simply impossible to sleep. The thought of Nancy as she turned, and tossed, and thumped her unfeeling pillow. The night was weirdly bright, as most nights are in Colorado, and (perhaps because she knew where each one was), those furnishings of the tower room which seemed so depressing eight months before, were dimly visible: the fat infant embroidered on the "spalash"; the mineral specimen clock which never ticked; the deformed kittens painted in oils; General Grant, and Aurora's mammoth calendar.

"It's surely strange," murmured the girl, "how you get used to things. I don't see that awful embroidered baby any more, and I don't see that clock any more. It just doesn't seem possible that this is our last night in Colorado, and that to-morrow Jack and I'll be joggling along somewhere in Kansas. Why, the day we got here, when Cousin Columbian dropped me off, I'm room so proudly, I thought I couldn't get away from it too soon; and now all I can think of is—suppose we hadn't come!"

About to ponder this awful possibility, Nancy turned again and saw that the door into her brother's room was opening. "Bad Jack," in muffled, irritated tones: "What the dickens is the matter with you, Nancy? That old bed lets out a groan every time you move, and I'd say you've turned over every three minutes of the last hour. Why don't you go to sleep?"

"Too tired to think about it. I'm figuring out what would have happened if we hadn't come to Colorado," said Nancy. "Jack sealed himself on the foot of the massive bed. 'I'd be earning my car fares in a broker's office most likely; and you'd be dragging 'round Edgemore, playing yourself and running up the telephone bill by calling your long-distance friends every few hours, and just to kill time. Honestly, sis, can you imagine living our whole lives without having known Cousin Columbian, or the Adams, or—going through that blizzard and everything? Maybe you'll laugh, but I feel lots older than when we came.'"

But Nancy didn't laugh. She said, thoughtfully: "You seem older, Jack. And I..."

Her analysis went no further.

HERE'S
The real way TO MAKE
BRAN HUFFINS, COOKIES, ETC.

USE Quaker Natural Bran—because it is specially intended for baking. You'll find it makes better, tastier bran dishes with the rich spicy, nut-like bran flavour. And that you'll have better results because, being natural bran, it mixes better and more lightly with other ingredients.

And what is doubly important Quaker Natural Bran is more economical for baking. Try it—there's a recipe folder and a valuable coupon in every package.

Uses Homing Pigeons

School Teacher Finds Them Handy For Sending Messages Home

Each Sunday afternoon homing pigeons fly from the yard of Martin Tucker of Wakefield, Mass., bringing the glad tidings that his school teacher daughter, Gladys, arrived safely in South Hampton, N.H.

Miss Tucker, who spends every week-end with her family found the telephone too expensive and the mails too slow. Homing pigeons, long a hobby of her father, solved the problem.

The pigeons return to the Tucker home in much less time than it takes for Miss Tucker to drive to South Hampton.

Cannot Be Answered

Food For Thought In Child's Question

About Speed

The wisest sayings often come out of the mouths of children. A man motoring with his family in the country and discussing with his wife the present-day craze for speed and the disastrous results that so often follow excess of a reasonable rate of travel was interrupted by his little daughter's question:

"What is the speed limit?"

"Twenty-five miles an hour," he answered.

"Then why do they make cars that go faster?"

"Because they are raised for meat in

sollicitous and over-protective in her relationships with her child is almost surely expressing some lack in her own life. She wants someone to depend on her, but what she may think is an abundance of love for her child is really an expression of selfishness on her part.

The child must learn to overcome difficulties and to meet problems. He should be assigned tasks, suited to his age, which will call upon his powers to overcome. He must not fail too often, or he will come to accept failure as normal. The child wants to achieve and receive for his achievements that recognition which he should have.

It is when normal development is halted by the lack of some of these essentials for healthy mental growth that the ground is being laid for difficulties in later life. Many of the problems and difficulties which afflict mankind arise from failure to grow up emotionally.

One thing we know is that as adults we make use of physical complaints to escape from something unpleasant if we have not learned, as children, to face conditions. Headache or sick stomach may arise from eye-strain or from gastric ulcers, but may also come from worry, fear, anxiety or family discord.

The future happiness and efficiency of each one depends largely upon his start in life. If, as adults, we remain in part children, then we are likely to have an uncomfortable time ourselves and to be a nuisance to others. Parents should learn how to guide their children to maturity—help them to grow up.

Application for Lease of Road Allowance or Surveyed Highway

Notice is hereby given that Sadie W. Dietz, of Milo, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz, South East Quarter of Section 15 and the South West Quarter of Section 14, T20, R22, W. 4th.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works Edmonton, within thirty days from the date of this notice.

Dated at Milo Alberta, Oct. 20th, 1935.
 (Mrs.) SADIE W. DITZ,
 (Applicant).

Brangeline Booth, 69-year-old commander-in-chief of the Salvation Army, told the "story of the Army" to the Men and Women's Canadian Club at the Royal York Hotel, Toronto, recently. "I was born in the Salvation Army," she said, "but it has never become a common thing to me. It has always been a miracle." A capacity audience gave her an ovation.

Ken outdoor man, enthusiastic member and past president of the Trail Riders of the Canadian Rockies, is leading a party of the ranks of the Trail Riders, J. M. Ward, chief engineer, National Parks of Canada, has won well-deserved promotion to the post of deputy minister of the Department of the Interior, Ottawa.

Frederic Dyar, of New Brunswick, was the chief speaker recently when the City of Saint John played host at a dinner in the Admiral Beatty Hotel to New Brunswick's guides at their twenty-fifth annual convention. Heavy rain put a stop to the outdoor part of the gathering, but a good membership under the chairmanship of William T. Griffin, of St. John's, president of the Association, enjoyed a successful gathering.

Rattie and Mrs. Tomi furnished the music. Mr. and Mrs. Palmer were the recipients of many nice gifts. They will live in the Palmer house in Shouldie.

Warning to Radio Listeners

OWNERS of unlicensed receiving sets are hereby warned that on and after 30th November, 1935, the Department of Marine will take steps to prosecute the owner or operator thereof.

Broadcast listeners who have not already procured their licence for the current fiscal year are accordingly advised to obtain such licence immediately.

The licence fee is \$2.00 per annum. Licences may be procured from Post Offices in cities and larger towns, Departmental Radio Inspectors, Radio Dealers, and others authorized to issue licences on behalf of the Department of Marine, Ottawa, Ont.

By order
 R. K. SMITH,
 Deputy Minister of Marine.

Russian Wheat Situation

Russia has been producing in recent years, on the average, about 850 million bushels of wheat per annum. This year it is said she has a bumper crop—some consider over 1,000 million bushels. Her population has greatly increased in the last ten years. The Soviet is now permitting the people to use more bread. Considering these factors, how much wheat will Russia have to spare for export to other markets? Only time will show.
